Skill based. Combat can be a bit "clunky", but overall, a fun action game.. This is how I see the DLC discussion going at SMS HQ:

"Hey guys, we got this dope F12TDF in the works. We spent a bunch of time on it and made sure it sounds amazing."

"Ok cool, let's chuck a bunch of random cars together and ship it next week."

"Next week? But we don't have the time to get the rest up to par with the F12TDF!"

"Ok, fine. We'll give you an extra week. We'll toss in Mugello and a pointless test track that no one will ever use for anything, ever, and ship it then."

Fiorano is pointless. The F40 handles and feels like a wet sponge. The FXX K has the lightest and numbest FFB ever. All the cars' trackside sounds are tinny and annoying.

The Berlinetta and the 250 Testa Rossa are decent.

So is this DLC's 13 dollar price tag worth it for ONE really good car, a good track, two decent classics and a bunch of useless content?

I dunno, I bought the season pass. You tell me.

Just give us mods.txt already so we can release livery packs for our league races please. I'd pay 13 bucks for that.. Played 44 minutes according to Steam.

Actually only played 10 minutes, the rest was sitting in lobby.

Significantly cancerous trolling community, the abuse flies constantly, no moderation or reporting present like in many f2p games. Leads to much BS.

The time I spent playing the game itself was in a "massive" CTF mode. Played 2 rounds. Combat is meh. The lack of balancing means that it can get very one sided very quickly.. Much more fun than I imagined it would be. I would like to see more modes added, possibly a co op wave defense. Windows MR users be warned you need to edit your controllers to enable a D pad for spell selection to work properly.. Like Starcraft, but not fun.

Game is interesting and I'm loving it, but it dropping to 10-15 FPS when I'm moving my team around is really offsetting to me. I'm unsure if it was because of my G4560 CPU or my RX 480 GPU, but either way I will request a refund for this and pick it back up if they manage to patch the game for better optimization. It's a damn shame since I've enjoyed all of Ghostlight's ports and never had a performance problem with any of their games.. I CAN NOT FIND NO DLC. Nice freemium. This game is a lot of fun to play, it has a ton of potential, and is constantly being updated. A lot of new content is planned and the bugs are being fixed. This game is definitely early access, but it's totally worth it. In its current state you could get several hours of play out of it, as I have. In the future, I can imagine spending a TON of time on it, especially as new features are added. If you can stand a few bugs, this game is fully worth the money.. Installed, ran, froze. Uninstalled and re-installed did the same again. DO NOT BUY. No support and a dud product.. An extraordinarily engaging story that really allows you to tailor the theme to your liking. Is it a tale of fighting against injustice? Or about selling your soul in exchange for decadence?

Massive fan, definitely worth the price (As is *Choice of the Deathless*, another game set in the same universe).. *I cant say this is a good game, as much as I like the idea behind it and the potential it has, it's just bad. The controls themselves are simply to horrible to really play the game, it's far to choppy and rigid to be a decent fighting game.. This game sucks. Why? Because they can't seem to get the lag out of it. Never again Playway, Mr Muffins!!!. Love this game to death. The whole series was amazing. :). Very interesting Zio*

*hope u successful <3*

*From TNT with love*

*p\/: why don't have anyone from TNT :(*
